

Securing Future Talent in Mining

Our Objective

Acorn HR has partnered with Central Regional TAFE to focus on putting together a 10 week Mining Readiness Program (MRP) where we will assist 10 candidates in gaining relevant skills, tickets and licences that can be utilised in the current mining labour market.

These 10 candidates will be job ready and placed into work with a predetermined client, where they will receive on-going support and mentoring to be an imperative part of the future in mining.

Utilising an in-depth screening process through multiple business structures, we aim to achieve a goal of 'Zero Turnover' and have all 10 candidates progress through to obtain gainful employment, assisting reported critical labour shortages in the Goldfields Region.

Each successful graduate of the program will complete units towards the below qualifications:

- **Certificate II in Leadership** | 52774WA
- **Certificate II in Surface Operations** | RII30115
- **Verification of Competency (VOC) and other relevant training documents.**
- **A variety of inductions for various sites in the Goldfields (depending on host placement/employer)**

This program will be a bench mark in the region for effectively delivering entry level local labour into mining industry. Solving a current supply issue which is predicted to become more critical as the demand grows in 2019.
